

13310-2009-154 Redband Trout Rangewide Status Assessment

State(s): Oregon

Managing Agency/Organization: Oregon Department of Fish and Wildlife

Type of Organization: State Government

Project Status: Completed

Project type: WNTI Project

Project action(s): Watershed, In-stream and riparian habitat, Genetic diversity

Trout species benefitted: Redband Trout

Population: Interior Great Basin

Develop a comprehensive status assessment for interior redband trout (i.e., outside the range of anadromy) in the states of California, Idaho, Montana, Nevada, Oregon, and Washington. Objectives are to: develop a geo-referenced database relevant to status and conservation for non-anadromous populations using variables common to other WNTI species (e.g., abundance, trends, habitat condition, genetic integrity and threats); and produce a comprehensive status review of interior redband trout that identifies priority populations and knowledge gaps, and prioritized habitats for conservation and restoration actions.

Work completed through this agreement will benefit the people of the United States by facilitating the restoration and protection of a public trust resource, redband trout, by assessing the status of populations, identifying potential conservation actions, and providing a basis for development of a conservation plan.

Objectives:

- Complete a series of Workshops to document Redband trout distribution and status

Partners:

- States of Oregon, California, Washington, Idaho, Montana and Nevada
- US Forest Service, US Fish and Wildlife Service, BLM numerous Tribal Nations

Measures:

- 13 workshops held
- Status review completed and published

Funding Source(s):

- National Fish Habitat Action Plan

Project cost: \$179,000.00

Start Date: 11/01/2011 **Completion Date:** 10/15/2012
