

WNTI RFP Process for 2027

WNTI is utilizing Survey123 as our platform for collecting applications for the FY27 National Fish Habitat Partnership Requests for Proposals (RFP) cycle. This is different from the online portal used over the past few years, and hopefully easier to use. We have created this document to walk you through how access the application portal to create your proposal.

How to submit your application:

1. Access the application portal [here](#).
2. You may exit the application and return to make edits or add information. You must use the same computer and browser in order to do so.
3. The application will not submit until all required fields are filled. Required fields are marked with an asterisk.
4. **When you complete your application, you must use the “Submit” button.**
5. You will be able to make multiple submissions from the same browser. However, if you choose to work on multiple submissions at one time, you must use different browsers.

If you have questions or issues with these steps or any technical questions about the Survey123 platform, please email Selena at reflectiongeospatial@gmail.com for technical support.
